

GLPM league run — season 25597

Generated 2026-07-22 12:07 UTC

What we collected

- **Matches:** 309
- **Team-match rows:** 336
- **Real xG / proxy xG:** 0 / 336
- **PPDA proxy / Wyscout:** 336 / 0

SportMonks is the primary source. Proxies are flagged — never presented as Wyscout-quality.

What we estimated (and why)

Field	How we filled it
Defensive actions	Tackles + interceptions + clearances
PPDA (pressing proxy)	Opponent passes ÷ our defensive actions
xG	SportMonks Expected Goals, or shot-based proxy if missing
Goalkeeper saves	Team stat or summed from lineup details

Machine learning summary

How the fitted 0–100 ratings are spread this run. A healthy engine usually shows a clear top–bottom gap (discrimination) rather than everyone clustered near the same score.

- **Engines trained:** 7 / 7
- **Learned variables tracked:** 1225
- **Variables changed vs previous run:** 0
- **Team headline ratings that moved:** 0
- **First baseline run:** no

Engine	N	Mean	Std	Min	Max	Spread	Top	Bottom
Attack	18	66.5	13.3	39.4	86.6	47.2	Heracles Almelo (86.6)	Fortuna Sittard (39.4)
Defence	18	60.3	17.2	27.8	93.5	65.7	FC Volendam (93.5)	Go Ahead Eagles (27.8)
Goalkeeper (starters)	10	69.7	13.7	44.4	84.7	40.3	Etienne Vaessen (84.7)	Ronald Koeman Jr. (44.4)
Build-Up	18	62.2	15.2	36.2	88.0	51.8	FC Twente (88.0)	FC Groningen (36.2)
Possession	18	61.2	11.2	42.5	78.1	35.6	AZ (78.1)	FC Groningen (42.5)
Pressing	18	64.4	13.0	41.0	88.0	47.0	NEC Nijmegen (88.0)	PEC Zwolle (41.0)
Finishing	18	63.4	14.7	40.7	88.8	48.1	FC Volendam (88.8)	Fortuna Sittard (40.7)

Reading tip: **Spread** = max – min. Very small spreads mean the engine barely separates clubs; large spreads with sensible Top/Bottom names are easier to trust.

What the model means as a whole

1. **Data** — SportMonks match stats (proxies where needed).
2. **Features** — per-match rates (shots, xG, PPDA, progression, ...).
3. **Seven engines** — context adjust → components → domains → primary → 0–100 calibration.
4. **Prediction** — rating vector + locked interaction weights (ATK–DEF 40%, FIN–GK 25%, BU–PRS 20%, POSS–PRS 15%) → Dixon–Coles markets.

This run: Learned weights effectively unchanged. Ratings may still nudge as latest matches enter the training set.

Training results (seven engines)

Full league table of assembled ratings (0–100). **Starter GK** is the highest-minutes lineup goalkeeper (SportMonks position).

- Attack 18 teams (attack_v1) · Defence 18 teams (defence_v1) · Goalkeeper 58 keepers (gk_v1) · Build-Up 18 teams (build_up_v1) · Possession 18 teams (possession_v1) · Pressing 18 teams (pressing_v1) · Finishing 18 teams (finishing_v1)

League rating table

#	Team	ATK	DEF	GK	BU	POSS	PRS	FIN	Avg	Starter GK	GK rtg
1	FC Volendam	76.8	93.5	74.6	57.1	52.1	71.1	88.8	73.4	Kayne van Oevelen	74.8
2	NEC Nijmegen	78.6	83.5	69.2	50.8	74.6	88.0	44.5	69.9	Gonzalo Crettaz	68.7
3	AZ	70.9	80.8	57.0	82.8	78.1	53.3	63.3	69.4	Rome Jayden Owusu-Oduro	82.2
4	Feyenoord	77.6	78.0	60.4	56.4	70.1	44.0	84.7	67.3	Timon Wellenreuther	—
5	Telstar	80.4	50.8	83.7	46.9	68.2	78.4	59.8	66.9	Ronald Koeman Jr.	44.4
6	Heracles Almelo	86.6	40.4	73.7	49.9	59.7	75.2	74.3	65.7	Timo Jansink	—
7	Sparta Rotterdam	45.4	54.6	63.8	75.5	60.7	76.9	80.9	65.4	Joël Drommel	63.8
8	Ajax	63.4	71.6	46.0	60.0	76.9	71.4	56.8	63.7	Vitezslav Jaros	45.8
9	FC Twente	52.1	55.1	79.0	88.0	51.2	61.1	59.0	63.6	Lars Unnerstall	79.2
10	SC Heerenveen	70.9	63.3	64.6	43.4	76.0	75.9	43.4	62.5	Bernt Klaverboer	—
11	FC Utrecht	69.0	45.7	64.1	79.3	48.1	56.8	71.6	62.1	Vasilios Barkas	81.6
12	PSV	70.9	47.0	52.1	87.3	72.3	51.6	52.0	61.9	Matej Kovar	—
13	Excelsior	60.1	84.2	72.5	69.1	49.7	51.1	45.1	61.7	Stijn van Gassel	71.5
14	FC Groningen	82.8	54.5	70.8	36.2	42.5	73.0	67.4	61.0	Etienne Vaessen	84.7
15	NAC Breda	66.8	56.3	46.0	58.2	62.6	65.1	64.4	59.9	Daniel Bielica	—
16	PEC Zwolle	46.8	48.9	66.3	68.0	55.3	41.0	84.9	58.7	Tom de Graaff	—
17	Go Ahead Eagles	58.0	27.8	56.8	63.5	53.6	72.3	59.4	55.9	Jari De Busser	—
18	Fortuna Sittard	39.4	50.3	53.5	46.4	49.2	52.9	40.7	47.5	Mattijs Branderhorst	—

Starting XI goalkeepers (by season minutes)

#	Team	Goalkeeper	Player rating	Season mins
1	FC Groningen	Etienne Vaessen	84.7	2604
2	AZ	Rome Jayden Owusu-Oduro	82.2	2052
3	FC Utrecht	Vasilios Barkas	81.6	3136
4	FC Twente	Lars Unnerstall	79.2	2790
5	FC Volendam	Kayne van Oevelen	74.8	2851
6	Excelsior	Stijn van Gassel	71.5	2820
7	NEC Nijmegen	Gonzalo Crettaz	68.7	2790
8	Sparta Rotterdam	Joël Drommel	63.8	3060
9	Ajax	Vitezslav Jaros	45.8	1710
10	Telstar	Ronald Koeman Jr.	44.4	2959
11	Go Ahead Eagles	Jari De Busser	—	3060
12	Feyenoord	Timon Wellenreuther	—	2970
13	NAC Breda	Daniel Bielica	—	2970
14	PSV	Matej Kovar	—	2790
15	PEC Zwolle	Tom de Graaff	—	2790
16	SC Heerenveen	Bernt Klaverboer	—	2700
17	Fortuna Sittard	Mattijs Branderhorst	—	2160
18	Heracles Almelo	Timo Jansink	—	1350

Note: 8 starting keepers have no player-level GK rating yet (team **GK** column above still comes from the assembled vector).

Variables that changed (with meaning)

No learned weights moved materially since the previous training snapshot.

Team rating outputs that changed

Headline team ratings unchanged vs the previous training snapshot.

What is still approximate until Wyscout

- True pressing intensity (zone-aware PPDA from events)
- Detailed goalkeeper involvement outside the box
- Shot placement coordinates for finishing refinement

Wyscout code remains in the repo. To reactivate: set `WYSCOUT_USERNAME / WYSCOUT_PASSWORD`, map entities in `glpm_provider_entity_map`, enable `GLPM_WYSCOUT_ENRICH=1`, then run `npm run glpm:wy-enrich -- <matchSmId>` after SportMonks ingest.

Sample match prediction

We picked **Heracles Almelo** vs **FC Groningen** as a sample fixture.

These numbers come from the seven skill ratings plus home advantage — estimates, not guarantees.

What changed this run

Previous report: `glpm-league-run-25597-2026-07-22T11-43-02.md`. Weight and rating diffs are in the sections below.

Model variable coverage

Counts of tracked learned weights (calibrator percentile maps omitted). Full coefficient dumps stay in artifacts / introspection JSON — this report keeps the readable summary.

Omitted 414 calibrator percentile rows.

Engine	Layer	Variables
attack	component	21
attack	context_adjuster	85
attack	domain	6
attack	primary	3
build_up	component	19
build_up	context_adjuster	76
build_up	domain	6
build_up	primary	3
defence	component	20
defence	context_adjuster	81
defence	domain	7
defence	primary	3
finishing	component	26
finishing	context_adjuster	105
finishing	domain	6
finishing	primary	3
goalkeeper	component	25
goalkeeper	context_adjuster	101
